

- **Date:** 2025-04-16
- **Time:** 02:30-03:30 PM
- **Location/Platform:** ERC Library Discussion Room
- **Attendees:**
  - Sangmoon Han
  - Soyeon Park
  - Yu-Tse Ling (Zona)
  - Man-Hua Chu (Kate)
  - Po-Yun Hsiao (Harold)
- **Agenda:**
  - Discuss backend solutions: compare different data storage, pricing and functionality
  - Clarify github branching strategy
- **Discussion Points & Notes:**
  - i. Decide to use Cloudinary for storing images and videos -> Using embedded videos as backup solutions if the first solution doesn't work.
  - ii. Decide to refactor the .tsx files, including text to match the newly designed frontend.
  - iii. Create a new branch for storing data
- **Action Items:**
  - Cloudinary setup - Assigned to: Harold - Due by: 20/4
  - Upload materials to Cloudinary - Assigned to: Zona, Kate - Due by: 20/4
  - Research on how to fetch material from the storage - Assigned to: Soyeon, Sangmoon - Due by: 20/4
- **Next Meeting:** 25/4 11:00 AM-01:00 PM
